Hi Julia-- lots of info on website relevant to this request. Feel free to direct her to the website, including the statement about the public comment period extension. Thanks!

<http://www.epa.gov/region8/superfund/wy/pavillion/>

EPA is extending the public comment period for the draft research report to September 30, 2013. During this time, EPA will continue its public outreach activities including meeting with key stakeholders and posting additional technical information on this website. This extension will allow the public additional opportunity to comment on EPA's draft report and the latest round of sampling conducted by EPA and USGS. The Agency will take into account new data, further stakeholder input, and public comment as it continues to review the status of the Pavillion investigation and considers options for moving forward.

Hi,

This call came in while I was off.

It is about Pavilion. You wanna handle or would you like me to pursue from here?

Thanks!

Subject: fracking

Hi, Julia. This is Rose Ellen O'Connor with Natural Resources News Service. The EPA did a draft study of water wells near fracking sites in Pavilion, Wyoming, in November 2011. It found dangerous levels of benzene and other chemicals in the drinking water. Someone told me the agency retracted the study. Can you tell me who can talk to me about this study? Just want to know if it was retracted or followed up with a final study. Thanks. You can reach me at 301-807-9871 or roselleno@verizon.net

UGH. sorry!

Because my brain is not working yet, Phillippa.

Please disregard!
